2018 Syllabus for Biology 221: Ecology Lab

Monday 1:20pm-5:20pm; 251 ISC

Instructor: Dr. Althea A. ArchMiller Office: 220 Integrated Science Center 218.299.3793 (office) / 218.556.8053 (cell)

Email: aarchmil@cord.edu Twitter: @aaarchmiller

Office Hours: Mon/Wed 10:30-11:00 & T/Th 10:30-12:00

The schedules and policies associated with this course may be subject to revision or change as a consequence of changing circumstances or events. Reasonable notification will be provided to students prior to any major changes in course policies or procedures.

Course Description & Goals

This field course will provide students with a foundation in ecological principles through hands-on work in the field. Students will develop their skills in framing scientific questions, arriving at testable hypotheses, and collecting, analyzing, and presenting data. After a brief introduction to the field, students will work in groups of 3–4 to select and develop their own group research projects. Research projects will be presented as scientific posters in a poster session at the end of the semester. Additional indoor laboratories will introduce students to modeling ecological processes, using data spreadsheets and applying statistics in ecology.

THE PRIMARY GOAL OF THIS COURSE is to enhance your understanding of ecology, which includes the complex interactions between organisms and their environment, through interactive, hands-on activities in the field and laboratory.

LEARNING OUTCOMES

- 1. Observe and identify organisms
- 2. Detect and interpret ecological interactions amongst organisms
- 3. Investigate the relationships between organisms and the environment
- 4. Accurately and effectively document field observations with field notes and data collection
- 5. Link field observations with key ecological concepts and relevant scientific literature
- 6. Execute the scientific method using reproducible research methods
- 7. Present scientific research results in the form of a scientific poster

REQUIRED TEXTBOOK: McMillan, V.E. 2012. Writing Papers in the Biological Sciences. 5th ed. New York: Bedford/St. Martin's.

Respect for Diversity

It is my intent that students from diverse backgrounds and perspectives be well-served by this course, and that the diversity that students bring to this class be viewed as a resource. Please let me know ways to improve the effectiveness of the course for you, personally, or for other students or student groups. As a student in this class, you are required to treat other members of the class with respect and kindness; disrespectful, rude, or exclusive behavior will not be tolerated.

Attendance Policy

Attendance in labs is required. If you miss a lab, you are responsible for getting the material you missed. Dr. ArchMiller also values the educational experience afforded by student participation in cocurricular activities; however, you are responsible for notifying Dr. ArchMiller of scheduled absences (e.g., co-curricular activities) at the beginning of the semester, or as soon as that information is available (but no less than 24 hours in advance). You must make up any missed assignments either before your absence or before the next class meeting. Any work missed because of a valid, college-recognized emergency absence (accompanied by a written excuse) must be made up as soon as possible after your return. Assignments are due at the beginning of the class period unless otherwise specified. Late assignments will be penalized 10% per day.

MOST LABS WILL BE OFF-CAMPUS. Please arrive promptly for class and prepared for a walk in all types of weather. Please, bring the following items to each lab:

Hand lens (optional) Sturdy shoes for walking Rain gear Sunscreen and/or sunhat Calculator Field guides (optional)

Water bottle Pencil or waterproof pen Field notebook (3-ring binder)

YOU ARE REQUIRED TO MAINTAIN FIELD NOTES each day that you are in the field. Field note forms will be provided for the first three labs. Please also bring a 3-ring binder for storing your notes and to write in during lab. Research-specific data sheets will be required for every day that you are in the field collecting data.

Participation

You will be working in groups, so participation—while it does not affect your grade directly—is essential to the quality of everyone's learning. Furthermore, a record throughout the semester of exemplary participation and attendance can help in the case of a borderline final grade. Active participation nurtures learning, and will improve the quality of future recommendation letters from your instructors.

Accommodations for Students with Disabilities

In accordance with the Americans with Disabilities Act, Concordia College and your instructor are committed to making reasonable accommodations to assist individuals with documented disabilities to reach their academic potential. Such disabilities include, but are not limited to, learning or psychological disabilities, or impairments to health, hearing, sight, or mobility. If you believe you require accommodations for a disability that may impact your performance in this course, you must schedule an appointment with Disability Services to determine eligibility. Students are then responsible for giving instructors a letter from Disability Services indicating the type of accommodation to be provided; please note that accommodations will not be retroactive. The Disability Services office is in Academy 106, phone 218-299-3514; https://www.concordiacollege.edu/directories/offices-services/counseling-center-and-disabilityservices/disability/

Academic Integrity (from Student Handbook)

"The Concordia community expects all of our members to act with integrity—to act with honesty, uprightness and sincerity. Every member of our academic community is charged with the responsibility of encouraging and maintaining an environment of academic integrity.

"Academic misconduct is defined as any activity that comprises the academic integrity of the college or undermines the educational process. Academic misconduct includes but is not limited to:

- cheating: using a resource other than one's own work to answer questions;
- plagiarism: misrepresenting another's ideas as one's own or not giving credit to the creator of a work;
- falsification: submitting falsified or fabricated information;
- facilitating others' violations: knowingly permitting or facilitating the dishonesty of others;
- impeding: placing barriers in the way of others' academic pursuits"

Biology Department Policy on Use of Electronic Devices

All electronic devices (including cellular phones) must be set to silent during scheduled lecture and laboratory sessions. Although I expect you may occasionally wish to take photographs with your cell phone or other electronic device, I also expect you to be respectful with your use of cell phones during lab. Distracting or inappropriate use of electronic devices will not be tolerated.

The academic integrity policy summarized here is designed to protect the entire college community. My role as instructor is to teach each of my students how to become responsible scholars. As such, I will not tolerate instances of academic misconduct. Instances of academic misconduct will result in either a failing grade for that activity or for the course, according to the perceived intent and extent of the instance(s) of academic misconduct. All academic misconduct violations will be reported to the Office of Academic Affairs.

Percentage	Grade
≥ 94	A
90-93.9	A-
87-89.9	B+
83-86.9	В
